

We curate borderless tech teams  
of all levels and tech stacks

We bridge the gap between an in-house and outsourced team.  
Access the best of both worlds.

## WE ARE HIRING

### Senior Fullstack Engineer, AWS

**Dedicated Client**

AI-native platform that is transforming the future of commercial banking for relationship managers

**Location**

Remote

**Work experience**

5+ years of commercial experience

**Type of employment**

Full-time & permanent (long term), hybrid or remote

**Start date**

ASAP

## What is Ivy Tech?

Ivy Tech is a London-based company that, since 2018, has been bridging the gap between global clients from the US, Europe, UK and Australia and borderless tech talent. Our vibrant, remote talent community drives innovation and embraces diversity.

**What we do:**

- Provide dedicated full-time work in innovative tech companies for the long term, with Ivy in the middle as your support structure.
- Access to a global network.
- Continuous career development and access to growth opportunities.

**What we don't do:**

- Blocking your career growth by constant project switching or sitting "on the bench".
- Unethical or unfair employment practices.

# We curate borderless tech teams of all levels and tech stacks

We bridge the gap between an in-house and outsourced team.  
Access the best of both worlds.

## What you get with us:

- Our developers are empowered to excel, tailoring their professional paths and influencing the evolving tech landscape.
- They get an opportunity to shape their careers and futures alongside industry leaders.

## Who is our client whom you'd be working with?

Our client is a UK based, seed funded early stage Startup. They are building an AI-native platform that is transforming the future of commercial banking for relationship managers. The platform automates and enhances high-value manual activities across onboarding, servicing, and expansion, utilising advanced AI capabilities to provide insights, recommendations, and content creation.

***Our client is currently putting their first core team together, and this is a one-of-a-kind experience of shaping the product and culture of this exciting Startup from day one.***

## Who is our client looking for?

Our client is seeking a highly skilled and experienced Senior Cloud Engineer who is extremely proficient in AWS services and has a strong background in backend development using Python and Java. The ideal candidate will have a proven track record of designing, developing, and maintaining scalable backend systems and APIs. They are looking for someone who is not only technically proficient but also able to work collaboratively with cross-functional teams, work closely with the Founders and the CTO, and drive the adoption of best practices in software development, as the product is being built from the ground up.

Ideally this candidate has previous experience of creating their own Startup or having been a crucial part of a previous early stage company.

# We curate borderless tech teams of all levels and tech stacks

We bridge the gap between an in-house and outsourced team.  
Access the best of both worlds.

## Key Responsibilities:

- Utilise AWS services to deploy, manage, and monitor applications, ensuring high availability, scalability, and security.
- Design, implement, and maintain scalable and efficient backend services and APIs using AWS, Python, and Java.
- Identify and resolve performance bottlenecks, implement best practices for performance tuning, and ensure efficient resource utilisation.
- Work closely with the CTO and other stakeholders to design and deliver a high-quality product.
- Write clean, maintainable, and well-documented code.
- Implement and manage CI/CD pipelines to automate the testing and deployment of applications.
- Identify, diagnose, and resolve complex issues in a timely manner to ensure smooth operation of the backend systems.
- We are expecting a 50/50 mix of actual coding and design/strategy work.

## Experience and skill requirements:

- Extensive experience with AWS services (e.g., EC2, S3, RDS, Lambda, DynamoDB, API Gateway, CloudFormation, IAM, CloudWatch).
- Strong proficiency in Python and Java for backend development.
- Experience in designing and developing RESTful APIs and microservices architecture.
- Proficiency in working with both SQL and NoSQL databases.
- Experience with Git and version control best practices.
- Strong analytical and problem-solving skills with a keen attention to detail.
- Excellent verbal and written communication skills, with the ability to convey complex technical concepts to a variety of stakeholders.
- Minimum of 5 years of experience in backend development, with a significant focus on cloud-based architectures.

# We curate borderless tech teams of all levels and tech stacks

We bridge the gap between an in-house and outsourced team. Access the best of both worlds.

- Experience in managing products and delivery teams
- The expectation is to bring lots of enthusiasm, commitment and excitement about this new Startup

## Nice to haves:

- Experience with Jenkins, GitLab CI, or other continuous integration and continuous deployment tools.
- Financial services domain experience
- Familiarity with Docker and Kubernetes for containerisation and orchestration.
- Knowledge of best practices in securing cloud applications and data.
- Experience with serverless computing and related AWS services such as AWS Lambda.
- Familiarity with monitoring and logging tools such as ELK Stack, Prometheus, or Datadog.
- Experience working in Agile/Scrum environments.
- Participation in open source projects or contributions to the developer community.

## What We Offer:

- Competitive salary based on experience and skills.
- The opportunity to work with a modern technology stack and build innovative products long-term (no bench time, no project switching!). Plenty of opportunities for learning and continued career growth.
- A great values-based company culture valuing general well-being.
- Flexible working: remote or hybrid with regular visits from the CTO to get the team together in person in Portugal for a few days each month or two
- Social package, which may include medical insurance.
- A minimum of 22 working days off per year (this includes annual leave + sick leave)

# We curate borderless tech teams of all levels and tech stacks

We bridge the gap between an in-house and outsourced team.  
Access the best of both worlds.

- Corporate events, merchandise, perks, and general well-being.
- Laptop (Mac or Microsoft) and monitors for use.
- We are a company based on the values of
  - Communication
  - Groundedness
  - Productivity
  - Commitment

**Thank you for considering a career with us!**
