of all levels and tech stacks

We bridge the gap between an in-house and outsourced team.
Access the best of both worlds.

WE ARE HIRING Senior Python Developer

Employer/Client	HealthTech Scaleup (US headquarters)
Location	Remote
Work experience	4+ years of commercial experience
Type of employment	Full-time and permanent

What is Ivy Tech?

Ivy Tech is a London-based company that, since 2018, has been bridging the gap between global clients from the US, Europe, UK and Australia and borderless tech talent. Our vibrant, remote talent community drives innovation and embraces diversity.

What we do:

- Provide dedicated full-time work in innovative tech companies for the long term with Ivy in the middle as your support structure.
- Access to a global network and opportunity to speak English daily.
- Continuous career development and access to growth opportunities.

What we don't do:

- Blocking your career growth by constant project switching or sitting "on the bench".
- Unethical or unfair employment practices.

What you get with us:

- Our developers are empowered to excel, tailoring their professional paths and influencing the evolving tech landscape.
- They get an opportunity to shape their careers and futures alongside industry leaders.

We curate borderless tech teams of all levels and tech stacks

We bridge the gap between an in-house and outsourced team.
Access the best of both worlds.

Who is our client?

The client, based in New York (USA), is an exciting HealthTech Scaleup that offers the most comprehensive, accurate API data platform that is the infrastructure for a future where every patient care decision is convenient, cost-effective, and high-quality.

Built to integrate seamlessly into existing healthcare workflows, it offers a reliable and straightforward way for providers, care navigators, health plans, and digital health solutions to develop and maintain accurate provider directories and competitive networks, simplify referral management, and ensure efficient care navigation — all in one platform.

Their mission is to simplify healthcare. They provide healthcare enterprises with an API layer for accurate data on doctors, insurance plans, and costs & quality of care.

You will have the opportunity to work closely with an international team and grow and develop as a person and a professional as you contribute to the project.

What is our client looking for?

Our client is looking for someone to shape and develop the solution actively, a collaborator who is willing to grasp and understand the impact of the technical solution beyond the technology. In this role, the client is hoping to find that “unicorn”, the person who is able to code, interpret and ingest data in a very solution-based way and also interact with customers to enable them to visualise the customer’s needs and outlook.

Responsibilities:

- Design, develop, and maintain Python-based applications and tools to support our data platform.
- Build and optimize data pipelines to ensure efficient data processing and analysis.
- Collaborate with cross-functional teams to understand customer requirements and develop tailored solutions.

We curate borderless tech teams of all levels and tech stacks

We bridge the gap between an in-house and outsourced team.
Access the best of both worlds.

- Provide technical support and guidance to customers, addressing any issues or concerns they may have.
- Stay up-to-date with the latest technologies and best practices in Python development and data engineering.

Experience and skill requirements:

- Strong experience in Python development, with at least 4 years of hands-on experience.
- Ability to design, develop, and maintain data pipelines and adjust systems as needed.
- English proficiency at level C1 or higher, both written and spoken.
- Experience working directly with customers, understanding their requirements, and providing solutions from the customer side.

Nice to haves:

- Previous experience in the US Healthcare system

What We Offer:

- Competitive salary based on experience and skills.
- The opportunity to work with a modern technology stack and build innovative products long-term (no bench time, no project switching!). Plenty of opportunities for learning and continued career growth.
- A great values-based company culture valuing general well-being.
- Flexible working: total remote.
- Social package which may include medical insurance.
- 20 days of paid annual leave; up to 10 days of paid sick leave (including mental health days) per year.
- Opportunity to speak English daily.

Access the best of both worlds.

- Corporate events, merchandise, perks, and general well-being.
- Laptop (Mac or Microsoft) and monitors for use.
- We are a company based on the values of
 - Communication
 - Groundedness
 - Productivity
 - Commitment

Thank you for considering a career with us!
