Full-time and permanent

What is Ivy Tech?

Ivy Tech is a London-based company that, since 2018, has been bridging the gap between global clients from the US, Europe, UK and Australia and borderless tech talent. Our vibrant, remote talent community drives innovation and embraces diversity.

What we do:

- Provide dedicated full-time work in innovative tech companies for the long term with Ivy in the middle as your support structure.
- Access to a global network and opportunity to speak English daily.
- Continuous career development and access to growth opportunities.

What we don't do:

- Blocking your career growth by constant project switching or sitting "on the bench".
- Unethical or unfair employment practices.

We curate borderless tech teams of all levels and tech stacks

We bridge the gap between an in-house and outsourced team. Access the best of both worlds.

What you get with us:

- Our developers are empowered to excel, tailoring their professional paths and influencing the evolving tech landscape.
- They get an opportunity to shape their careers and futures alongside industry leaders.

Who is our client?

Our German-based client provides a cloud solution that stops people waiting on hold when making a customer service phone call. The AI-powered product portfolio includes virtual waiting, virtual assistants, advanced ML scheduling algorithms, and more. The enterprise software provides a unique customer experience with cutting-edge technology.

The head of engineering is heavily invested in the professional development of his team members and, in return, is looking for candidates who want to make an impact, take ownership of their work, and help shape the product for future growth.

What is our client looking for?

Our client is looking for the ultimate collaborator, willing to grasp and understand the impact of your technical solution beyond the technology. This start-up conceptualises simplicity, design and a flat hierarchy and creates the opportunity to actively shape and develop software within an incredible team.

Experience and skill requirements:

- You want to learn and grow as a Senior UI/UX Developer in an innovative and vibrant tech environment.
- You have 4+ years experience in designing and implementing responsive web frontends.
- Strong affinity and proven track record in creating a web application style guide and a compelling user experience.
- You are able to visualize your design ideas with wireframes.

We curate borderless tech teams of all levels and tech stacks

We bridge the gap between an in-house and outsourced team.
Access the best of both worlds.

- You are familiar with QA mechanisms for web applications.
- You know how to translate a product vision and business features into technical requirements.
- You speak English fluently.
- A university degree in computer science with focus on media and design or comparable education.
- You are an empathetic team player with strong communication skills.

Nice to haves:

- You have experience with securing and enabling high availability for critical services.
- You are familiar with incorporating accessibility into UIs.
- You have experience in relaunching a multi-stack web application with a new style guide.
- You know how to work efficiently in a distributed environment.
- German language skills are a big plus.
- You have some background in the telecom industry.

What We Offer:

- Competitive salary based on experience and skills.
- The opportunity to work with a modern technology stack and build innovative products long-term (no bench time, no project switching!). Plenty of opportunities for learning and continued career growth.
- A great values-based company culture valuing general well-being.
- Flexible working: total remote.
- Social package which may include medical insurance.
